

## UNIT 5

### Exercise 1

### Exercise 2

create files: to make new programs, utilities or documents

central processing unit: the principal microchip that the computer is built around

software products: these enable a computer to perform word processing, to create databases, and to manipulate numerical data

display information: a monitor will do this on a computer screen

digital data: this describes the format of 0 and 1 in which information is stored

expansion card: you plug this into a slot to add features such as video, sound, modem and networking

integrated circuits: when two or more components are combined and then incorporated into a single package

computer network: a group of electronic machines connected by cables or other means which can exchange information and share equipment (such as printers and disk drives)

### Exercise 3

- |                       |                           |
|-----------------------|---------------------------|
| 1 display information | 5 create files            |
| 2 digital data        | 6 computer network        |
| 3 software products   | 7 central processing unit |
| 4 integrated circuits | 8 expansion card          |

## UNIT 6

---

### Exercise 1

1 b   2 a   3 c   4 a   5 c   6 b

### Exercise 2

1	downtime	5	intranet
2	interconnected	6	upload
3	transmitted	7	connections
4	compatible	8	combine

### Exercise 3

e   a   j   d   f   b   h   i   c   g
